I have several big squares, rounds and small squares for sale. All pure alfalfa hay. Hay has been tested and depending on the crop varies between 123rfv and 173rfv with high 20's in protein percent. I would like to get \$6 per small square bale and \$150 dollars a ton for the big squares. (Average about 800 to 1100 lbs) \$100 dollars a ton for the rounds (average about 1500lbs). Message me for any details and please comment on post if you do so I know to check my other folder. Delivery is available for extra charge.
