Price:

1.00 \$

im asking 1,000 thousand dollars here is a very nice build this setup can play over 7,000 games online it is truly a beast and to top it off its 9th gen capable processor it is a MSI MAG Z390 Tomahawk LGA1151 (Intel 8th and 9th Gen) M.2 USB 3.1 Gen 2 DDR4 HDMI DP CFX Dual Gigabit LAN ATX Z390 Gaming Motherboard with an MSI GAMING GeForce GTX 1060 6GB GDDR5 HDCP Support DirectX 12 Dual TORX 2.0 Fan VR Ready Graphics Card (GTX 1060 GAMING X 6G) and an Intel Core i5-8400 Dehere sktop Processor 6 Cores up to 4.0 GHz LGA 1151 300 Series 65W cpu and Patriot Memory VIPER 4 Series 3000MHz (PC4 24000) 8GB Dual Channel DDR4 Kit PV48G300C6K and a Phanteks Eclipse P350X (PH-EC350PTG_DBW) Compact EATX Mid-Tower Case, Tempered Glass, Digital RGB, Black/White with Intel Optane Memory M10 16 GB PCIe M.2 80mm all this is powered by a corsair 600w semi modular psu it has a 120gb ssd with win 10 pro and 2 1tb satas for storage this whole setup is completely off the hook it is not someones wore out system its built to sell it comes with my personal warranty for 6 months i will do your upgrades for you and fix any problems you encounter if any it will play any game on extreme settings no problem what so ever try it out 1st if you like this is a serious gamer I would like to mention that most people when they go build a computer have no clue what

being done this is the best between the motherboard and graphics card and something that goes together for the best computer for the price of the hardware
