Laptop is in excellent condition and runs well - the only thing I have noticed is that it needs to be connected to the charger when powering up , even if it is fully charged. It can hold a charge and be used off of a power source, but just needs to be plugged in while starting up. It's a great device that has served me very well; I have transitioned to working primarily on an iPad for animation work, so I don't use the laptop enough for me to keep it (as I am diving deeper into themes of minimalism in the material world).
