Address: Elm Street Park, Edmonds

Price: Free

The washer was in the home we moved into and we already have our own machine. The washer works fine. Included with it are the hoses on the back to hook up to the water supply with. It is a stackable model and includes the stacking mount and all parts.

Note: This is a compact machine that takes smaller loads. See details at the end.

First person ready to come and get the washer is welcome to it. If you are interested, line up your vehicle and helper, and then let me know.
