This console is about 80 lbs. and 39" x 8.5" x 27.25"

This is a high end piece of vintage audio mixing equipment from the 80's. It still works perfectly and can create high quality and complex audio productions. This is a great piece of equipment for people who are interested in creating work that sound as professional as possible. It is also a great piece of equipment for people who are interested in the history of audio mixing.
