Marshall DSL-100-HR Solid State TUBE Amp - Dual Reverb

I bought this from Sweetwater Guitar last year for my Les Paul guitar. But every time I power it up and pluck a string, My dogs and wife go to barking and howling. The Amp is flawless and still has the original box and as far as I know it is still under Sweetwaters warranty. It comes with one 4x12 cabinet so it is a half stack. I have had many amps in my music days but the Marshall Tube has to be the cleanest sounding amp I have ever had. Its the TUBES from what I have learned. I don't have a pedal board and could not imagine what it would sound like with a floor full of those. It can also be used as a P.A. system if you just want a crowd of people to hear you. Both the head and the cabinet together values over 1200 and weighs 135lbs so it is for local pick up or I will deliver it to you. I will accept REASONABLE offers. If you are interested, call Ray @ 6083391852
