Address: 2816 E Hampshire St Inverness, Croft Ave

Price: 125.00 \$

Onkyo's TX-SR701 6.1-channel = home theater excitement!

100 full-bandwidth-rated watts x 6 channels and dual 32-bit processors team up for spectacular performance, whether you're enjoying movies or music.

Surround decoding options include three 6.1 formats -- THX Surround EX, Dolby Digital EX, and DTS-ES. Plus, THX Surround EX and DTS Neo:6 modes give you a variety of ways to transform all of your surround sources into convincing 6.1 audio.

192kHz/24-bit DACs deliver spectacular precision from all your digital sources.

Pure audio mode shuts down unused circuitry to keep even the subtlest of noises out of your audio.

Onkyo's WRAT (Wide Range Amplifier Technology) provides response out to 100,000 Hz, letting you take full advantage of high-resolution multichannel sources like SACD and DVD-Audio.
