Address:

Aurora 7 Park Area., Baseline, Boulder

Price:

1100.00 \$

Santacruz Blur Long Travel: This mountain bike is in EXCELLENT condition. I personally built this bike and maintained it. 26" tires new Maxxis this year. Rear shock is Fox RP23 w/140mm, Front fork is Fox Float RL w/140mm. Rear suspension had had new bearings installed and is smooth. Front Fox fork has less than 500 miles in it and was just installed this year. Carbon fiber handlebars. WTB premium seat. Disc brakes. Drivetrain is in great condition, chain just replaced 1 mo ago. Drivetrain shifts smoothly. This is a perfect bike if you are starting out in mountain biking.
