Address:

Bell Hill, Sequim

Price:

8400.00 \$

This 2018 Forest River Freedom Series 1940LTD Power Lift system Tent Trailer offers two tent end beds. A front queen and a rear 48" x 80" bed provide comfortable sleeping with more walking around room inside. A twin bed can be made with the seat cushions.

As you enter this folding pop-up camper, there is a cabinet to your right and a cabinet with a two burner range to your left. On the opposite side there is a booth dinette and a single bowl sink along the road side wall. A refrigerator is included.

The range or grill can be a carried outside for convenience while you enjoy the shade from the 9' awning.

The pop-up mechanism is electric/battery operated, with a crank as a backup. Most camp sites now have electric and water hookups. There is a cord at the front of the unit that plugs into the back of a truck so the fridge stays cold and the battery charges as you are driving... if you don't have that outlet on your truck, something to consider getting. When at a camping site, the main electrical cord plugs into the campsite outlet, and everything electric is operational. If you do not have an electrical hookup, the battery will run the lights and the

power outlets inside the tent will not work. The battery can last 9 days. The power outlets have (120v AC electricity)...
