As the title states, barely used mint-condition paintball gun. It is a metal gun, aluminum or some other material, black, mechanical, and select-fire. It is the .68 caliber paintball marker that you can find on Amazon and other online retailers; purchased quite a few years ago but only used 4-5 times at most. I also include a 48 cu. Guerilla Air Cannister so everything needed to start playing paintball is included except some paintballs.
