FREE TO A GOOD HOME: Sears Kenmore Model 90 Automatic Zig-Zag sewing machine, Model Number 158.900; Serial Number 004317. This machine was made in the early 1960s, and includes the instruction booklets, decorative pattern cams, and button hole attachments. This machine was constructed to be mounted in a cabinet, but has been removed from the cabinet, as the cabinet has a broken leg, and could not be trusted to support the machine, We still have the cabinet, and you are welcome to take that too, if desired; otherwise it will be discarded. This machine was working okay when it was stored away about 5 years ago; tension and presser foot needed adjustment, but still sewing successfully. Ideal project for a fix-it kind of tinkerer/hobbyist who would want to repair the broken-legged cabinet, and recondition the machine. PICK UP IN WHITEWATER.
