This is a well conditioned and complete Lea children's bedroom set from the 1970's. Set comes with a desk, a two part hutch, a nightstand, and two twin sized beds that stack to make a bunk bed; complete with a guard rail and ladder. No mattresses or box springs included, so you can obtain the ones you want. The set was originally bought in Denver in 1974 and has always lived in Colorado's dry arid climate. For its age, the actual wood furniture is in exceptional condition; little to no splitting of the wood, the dark finish still has its luster with little patina, and all the metal hardware is accounted for on each piece. Give your children a space they can live in and be proud of with these solid and sturdy functioning pieces of vintage styled furniture. These units were built to last, and are of a better craftsmanship than what people can find at most of today's furniture stores.
