80s Trucker hats with local businesses and community gathering's some of the businesses have been shut down for many years and they are a great piece of local history. there are 21 hats and these are terrible pictures so if you need better ones I can take more. they are wearable and in great condition. they are one size fits all. I want to sell them because I don't have the knowledge or memories of these places being I'm younger and the fact i don't wear hats because of my luxurious hair :)
