The 2265+ is undoubtedly at the pinnacle of serial impact printing, representing the peak of performance in its respective speed segments. It is not just 'sprinter'; reliable, heavy workload output is guaranteed for the many years following its purchase. The print is crisp, sharp, dark and absolutely legible, thanks to the 24 pin print head. Fully automatic operation instills operator confidence and virtually eliminates errors caused by poor user intervention.

Front feed provides all the benefit of easy, rear installation, coupled with reliable, easy transport. This product is well suited to Microsoft Windows applications and entire serial
