We're needing someone with a truck and a trailer to remove a pile of miscellaneous junk. We just moved into a home and the people who lived her prior to us were just nasty. There started what I can only assume is a burn pile but put crap in it that won't or shouldn't burn (must be from the city). It's only a trailer full but I ain't getting out there and doing it because I don't do snakes or snakey areas.
