Little Tikes Jungle Climber Play Set \$75

This jungle climber is perfect for active monkeys! Children can cascade down the wavy slide. Ground level openings connect one play area to the next via a secret get-away. Each pay-area section has a molded jungle print effect on the wall providing a realistic jungle theme.

This is a great play set for out back or in your basement during winter months. This set is in excellent condition, but does not include the "jungle rope" which can be easily replaced.
