Price:

Free

Hello Tenant, my name is Stavo, a big-time business man.

Thanks for your interest, I personally own the duplex house in United State California. I want my property to be well taken good care of, and there are some rules and regulation in which I do give out to tenant who are willing to rent my house so please don't disrespect my order. But if you are still capable of renting my house, the rules and regulation goes this way, You must keep my house clean including the surrounding, you must know the way in which you use the stove so as to avoid fire outbreak, you must not disturb the neighbor. . I decided to rent out the property due to our transfer to (West Africa) as a matter of my profession where I work as a volunteer with Evangelical Council of Financial Accountability (ECFA), and my wife who is also a missionary is dealing with Bible Translation and literacy worldwide. So we are renting it out since we need someone to take good care of the property on our absent. Don't be surprised if you find the home with another site and deference price, I have plan to rent it through Real estate before, but they are not serious simply because they have a lot of house to lease out. And they added some money to the rent while there commission is not fair.

Have this in mind you must know the kind of person that I'm nevertheless I am giving you this rules because of what corresponded between me and my last tenant. The laws and documents are with us here in West Africa. You will need to pay attention to you before you
