Getting rid of this amazing desk. It's long shape gives tons of room for all your junk and the frame underneath stays out of the way of your legs. The table top comes in two parts attached together by two metal plates underneath fastened by eight screws each (two of them have been stripped, but super easy fix). The metal frame comes apart with an allen wrench into two frame stands and four bars.

It's the easiest desk to break down and transport in the world. Cosmetically, it's still in really good shape with a few dings and two inch long edges where the covering is peeling.

Approx 4.5 x 3.5 x 2.5
