I am selling my wood boiler, this unit is only 3.5 years old. Purchased in 2014. New it was \$9600.00 installed. It is the largest boiler. This boiler can have three pumps running off of it. I only am running two off if it know. It is heating my home and 30x40 pole barn, just having to mch back pain to keep cutting wood. There are some spare to go with it. A 16x20 open metal wood shed goes with it to keep your wood dry. Asking 8200.00 for it
