I'm an "All-inclusive" Online Presence Manager which means that I manage every aspect of my customer's online profile while consulting with them to improve their brand presence on the web. This method allows my clients to focus on building their brand directly with their customer while I take on the time-consuming task of marketing their business digitally across various platforms.

How I would improve YOUR brand presence online, specifically:

1. Install & Configure Search Engine Optimization Tools

Your website must be on the WordPress CMS.

2. SEO Existing Pages & Images

Using the SEO tools I configure and install, I will do a complete site SEO.

3. Curate Your Existing Pages to Social Media
