'93 34' Fleetwood Flair Motor Home. 71,000 miles (aprox.). Aprox. 30,000 when I purchased. Just plain too old and arthritic to do any more. Totally lost interest. Purchased and used to travel from church to church to earn support to go to the mission field. Unit has been from Main to Texas and the East coast to the West coast. Pretty rough when purchased. I have done a multitude of fixing and repairing after purchase. 454 Chevrolet engine with headers (runs strong and always starts very easy), life time air filter, new paint job, very good tires, 2 new air conditioner units, pull-out pantry, added a large drawer under couch, new upholstery on couch and chair, new mattress on bed. recent new battery for engine, lots of storage. Gets the usual 7.5 MPG whether you are pulling a car, full of water and fuel, or not. 8 MPG is about the best I ever did. That's usual for this size engine. We lived in it for some time after returning from the mission field (retired) and now it could use some TLC. Air conditioner compressor for dash air is shot. Fuel line is plugged to generator, or carburetor needs cleaned, otherwise always ran great (generator). Uses 2 quarts of oil from Atlanta ,GA to Hutchinson, Kansas. Also normal for this engine. Always ran Amsoil synthetic products in engine, differential, and transmission. Has 2 extra radiators connected to transmission cooling system. Extra 40lb. LP tank and "long stay kit" if regular tank gets

low or runs out. We looked long and hard before we purchased it and found more than we needed. Price is always made to look better than it is. Hope you have for it.
