Address:

Price:

1500.00 \$

10 foot quilting frame with an excellent, professionally serviced sewing machine. I have quilted over 30 quilts on this machine. It performs beautifully and is particularly well suited for an all over design. You can also use a pantograph with the laser system. This set up can be pushed up all the way to the wall, so you do not have to dedicate your entire room to the machine.

When you think about quickly and easily quilting all your own quilts, imagine how many more you can make without having to spend \$200 or more per quilt to finish AND you'll be able to say you did it all yourself!
