The Solvit HoundAbout™ Pet Bicycle Trailer is a great way to maintain an active lifestyle with your pet.

Leashing your pet to a bicycle is inherently unsafe for pets and owners alike - the HoundAbout Trailer solves that problem and your pet will love the ride. It's also great for older pets or those with joint problems. The newly designed 2010 model includes a new axle design, which lowers the cabin by three inches for easier access for pets. In addition, the wheel base has been widened to provide greater stability while riding. The cabin has a cleaner, sportier look and now includes a sunroof and special pocket for cell phone, keys, etc. A larger, softer cushion provides added comfort for pets.

The front door on the trailer includes a zippered, mesh screen layer, and a zippered, vinyl layer to block wind and weather. Use them in different configurations depending on riding conditions.
